
WebDev Project 1

OVERVIEW

A static multi-page homepage website for Aryan Yadav. The webpage highlights work experience, projects and achievements. Two pages must be human constructed and one page AI constructed.

GOALS

1. Display developer projects and experience efficiently
2. Create a pleasing and unique aesthetic
3. Create an original vanilla JS component

SPECIFICATIONS

The site will use a light background with a dark and high-contrast combination where the user's focus needs to be drawn. The visual style is detailed in the mockups. The site will consist of a homepage that gets straight to the point with projects, an about me page and a contact page. The homepage will use vertical tabs to highlight projects, with an other tab that uses JS to fetch recently updated and most starred repos from the users GitHub.

Made with ♥ by Aryan Yadav

Personas

1. Jane, Recruiter: Fast moving, opens site from LinkedIn, resume, needs access to relevant info quickly.
2. John, SDE: Developer looking to collaborate, interested in all projects, needs github urls and contact info.

-
3. Alice, Older person with less tech literacy: Looking to get in contact for tech needs, needs easily navigable site, simple contact info.

Stories

1. As Jane I'm looking at many portfolios, the website gets to the point and does not waste my time. She opens this site and the easily accessible windows into experience and projects makes it trivial for her to make a quick judgement, her time is respected.
2. As John I'm looking for a detailed look into a developer's projects, contributions and personality. He goes through the highlighted projects and sees the most recent updated and most starred repos in the other tab. He can quickly take a look at the repos and decide if he wants to collaborate. The about page humanizes the person behind the site.
3. As Alice I'm looking for an experienced dev to contact about a query or a personal project but I am not too familiar with technology and easily overwhelmed. The page is extremely simple with very few things to click. The contact button stands out and would allow Alice to bypass interacting heavily with the site if she prefers and ask questions directly.
